

Polyclonal Antibody to Human Cytokeratin

Description:

Immunogen:	Cytokeratin isolated from stratum corneum of human epidermis.
Host:	Rabbit
Format:	Purified immunoglobulin fraction of rabbit antiserum against human cytokeratin containing sodium azide as preservative.
Specificity:	This antibody reacts with cytokeratins of 56 and 64 kD MW.
Titer/Working Dilution:	This antibody may be diluted to a titer of 1:75-1:200 in an immunohistochemistry application. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Uses/Limitations: Immunohistochemistry
For Research Use Only.
Do not use past expiration date.

Storage: 2-8° Centigrade.

Procedure: We suggest an incubation period of 30-60 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. Proteolytic enzymatic pretreatment of the tissue sections is recommended prior to immunostaining.

Precautions: Contains Sodium Azide as a preservative.
Do not pipette by mouth.
