

Polyclonal Antibody to Human Lysozyme (Muramidase)

Description:

Immunogen:	Lysozyme isolated from urine of patients with monocytic leukaemia.
Host:	Rabbit
Format:	Purified immunoglobulin fraction of rabbit antiserum against human lysozyme containing sodium azide as preservative.
Specificity:	This antibody reacts with lysozyme. It stains granulocytes, monocytes and macrophages in human tonsil, skin and colon. This antibody does not cross-react with any other cell types.
Titer/Working Dilution:	This antibody may be diluted to a titer of 1:100-1:150 in an immunohistochemistry application. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Uses/Limitations: Immunohistochemistry
For Research Use Only.
Do not use past expiration date.

Storage: 2-8° Centigrade.

Procedure: We suggest an incubation period of 30-60 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user.

Precautions: Contains Sodium Azide as a preservative.
Do not pipette by mouth.
