

Polyclonal Antibody to Human Chromogranin A

Description:

Immunogen:	C-Terminal half of chromogranin A purified from urine of patients with carcinoid syndrome.
Format:	This antibody has been pretitered and quality controlled to work on formalin-fixed paraffin-embedded as well as acetone fixed cryostat tissue sections. No further titration is required.
Specificity:	This antibody reacts with human chromogranin A, but not with epitopes located on the N-terminal half of the chromogranin A molecule. Traces of contaminating antibodies have been removed by solid-phase absorption with human plasma proteins and human urine proteins.

Uses/Limitations:

Immunohistochemistry
For Research Use Only.
Do not use past expiration date.

Storage:

2-8° Centigrade.

Procedure:

ScyTek suggests an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user.

Precautions:

Contains Sodium Azide as a preservative.
Do not pipette by mouth.
